

Construction beginning as early as August 17

Through a competitive process, the City of Redmond has selected Kamins Construction Inc. to complete construction on the 50th Way Flood Reduction project. Construction is expected to begin as early as August 17 and will last for approximately 3 months.

Construction will begin in Zone 4 near West Lake Sammamish Parkway and NE 50th Way and will continue through Zones 3 and 2, ending in Zone 1. See the graphic to learn more about the zones and work being performed in each area.

About the project

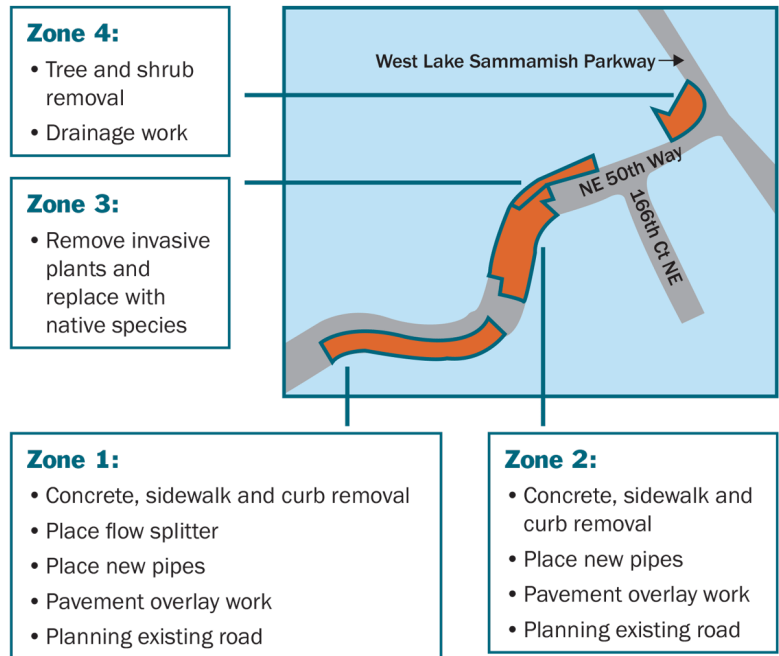

The 50th Way Flood Reduction project will install 520 feet of new pipes to direct stormwater away from Tosh Creek and reduce flooding along NE 50th Way.

What to expect

While construction can be disruptive at times, we are committed to minimizing impacts where possible and helping you understand the impacts you may experience. During construction, you can expect:

- **Work hours:** Construction activities will typically occur between 9 a.m. and 3 p.m. Monday through Friday. We will communicate with residents if work is planned outside of normal project hours.
- **Temporary lane and driveway closures:** For your safety we will provide signs and flaggers to direct traffic when we need to close a lane. We will communicate with residents prior to any temporary driveway closures.
- **Tree removal:** Some trees and shrubs will be removed where they conflict with stormwater pipes near the bottom of the hill. New trees and shrubs will be planted along the stream where they will not conflict with pipes.
- **Increased truck traffic, noise, dust and vibrations:** Construction activities can be noisy and dirty. During construction there may be increased traffic from trucks driving equipment and materials into the construction site.
